PRESS RELEASE

DIESSE ANNOUNCES THE LAUNCH OF NEW KITS FOR THE QUANTIFICATION OF VITAMINE B12 AND FOLATE ON CHORUS SYSTEM

Siena, 25th October 2022 – DIESSE Diagnostica Senese is proud to announce that two new tests for Vitamin B12 and Folate will be available by the end of November.

Vitamin B12 and Folate quantification is important to investigate the causes of anemia or neuropathy, to evaluate nutritional status in some patients or to monitor the effectiveness of treatment for these vitamins.

These new kits will be available on CHORUS systems as mono-tests, enriching the over 150 tests available in the analytic menu of the instrument.

“These new products confirm DIESSE commitment in providing qualitative diagnostic solutions to improve patient outcome,” says Luigi Nava, Commercial Operations Director. “This further launch was made possible thanks to the determination of DIESSE people, from R&D to production departments, who worked with professionalism and passion to provide more than 10 new kits for autoimmune and infectious diseases throughout this year.”

In fact, in 2022 DIESSE completed the panel of tests for Flavivirus, enlarged the CHORUS Promonitor menu for biological drugs monitoring and launched the new kit CHORUS suPAR Extended to monitor inflammatory status. With CHORUS Vit B12 and CHORUS Folate assays, DIESSE shows once again its involvement in the improvement of clinical effectiveness of IVD laboratories.

DIESSE Diagnostica Senese S.p.A. is an Italian company which produces integrated and entirely in-house in-vitro diagnostic systems. Its headquarters are in Siena. Since its foundation in 1980, the company has developed, produced and marketed innovative diagnostic systems mainly in the field of immunodiagnosics and automatic ESR measurement.

The company has a global presence in over 100 countries, has 3 production sites and 1 research center, where the design and implementation of tests and new automated diagnostic detection tools meet Italian design and cutting-edge technology, identifying DIESSE as an example of real "Diagnostics Evolution".
